METHOD, SYSTEM, AND PROGRAM FOR
VIRTUALIZATION OF DATA STORAGE LIBRARY ADDRESSES

ABSTRACT

Disclosed is a method, system, and program for using storage slots efficiently. A move command is received to move a portable data storage medium from a source address to a destination address. An empty storage slot that has no association with the destination address is located. The portable data storage medium is moved from the source address to the located empty storage slot. An association is stored between the located empty storage slot and the destination address.
